Category:2003 films Category:2000s Hindi-language films Category:Indian films Category:Films shot in Ooty Category:Films set in Ooty Category:Indian drama films Category:Films directed by Indra KumarThe role of LH-RH agonist in the treatment of endometriosis: a meta-analysis. Efficacy of LH-RH agonist in women with endometriosis is controversial. We sought to determine the efficacy of LH-RH agonist in the treatment of endometriosis by meta-analysis. A literature search was performed using MEDLINE, EMBASE and Cochrane Controlled Trials Register until December 2000. Only randomized, double-blind trials in the treatment of endometriosis with LH-RH agonist were selected. Heterogeneity of studies was tested with Cochrane's Q and I(2). Effect size was derived from point estimates. Eight randomized, double-blind studies were selected. Study quality was moderate, with Jadad score of 3. Total number of patients studied was 365. Women were randomized either to placebo or gonadotropin releasing hormone agonist for 3-12 months. Surgical outcome, pregnancy rates and side effects were compared between the groups. Endometriosis was confirmed in all studies by laparoscopy or laparotomy. Patients treated with LH-RH agonist were significantly younger (32.8 years vs. 36.0 years) and smaller (140.4 cm vs. 144.7 cm). For the first 3 months of the treatment, the median (95% CI) reduction in peritoneal, deep infiltrating endometriosis lesions was similar for both groups (29.0% [19.4-36.8%] in the placebo group and 29.2% [24.3-34.2%] in the agonist group). During subsequent follow up, the median (95%) CI) reduction was 13.1% (11.3-14.8%) for the placebo group and 5.8% (0.0-11.7%) for the agonist group. Subgroup 82138339de
