Magayo World Time Weather Crack + For PC

Magayo World Time Weather is a lightweight software application designed specifically for helping you check out the weather details for the desired location and calculate the current time for towns located in different time zones. Clean feature lineup When you run the program for

the first time, you are welcomed by the configuration panel which allows you to customize the clock and weather data that appears on your screen. All dedicated parameters are embedded in a single panel, so you can easily tweak them. The clock doesn't take too much space on your screen and you can use the drag-and-drop support to move it to the desired area. Generating a new clock magayo World Time Weather gives you the possibility to create a new clock by selecting the country and city, and entering a user-defined text message that can be customized in terms of large, normal, or small font size and color. Plus, you can show

weather information and use light or dark icon colors, pick the unit of measurement (Celsius or Fahrenheit), as well as choose the date and time format (and change the color and font size for the text). All the adjustments applied to the clock can be previewed in a dedicated panel. Time converter

The utility features a handy time conversion option which allows you to calculate the current time for towns located in different time zones. It embeds two built-in calendars for helping you select the date, and lets you choose the time, country, and city from drop-down lists. Last but not least, you can edit the current clock, hide or

reveal it, automatically check for software updates, add multiple clocks and display the weather information for multiple cities, as well as set up the proxy parameters. Bottom line All in all, magayo World Time Weather offers some handy parameters for helping you view the time and weather for the desired location, and is suitable for rookies and professionals alike.

Magayo is a smart weather app. It calculates weather forecasts, will display your best forecast, with detailed information for the chosen location, and you can even setup a detailed weather forecast for your friends and family! SmartWeather Weather
