Interactive Development Environment (IDE) The AutoCAD/Interactive Development Environment (IDE) is designed to simplify the process of developing extensions to AutoCAD. The IDE is a Web server with a Microsoft.NET Framework-based user interface, which enables script developers to use the AutoCAD API. It provides a Web browser-based application programming interface (API), Visual Studio-like features, drag-and-drop debugging and IntelliSense. The IDE is no longer supported since AutoCAD 2016. AutoLISP AutoLISP is a programming language for AutoCAD. AutoLISP is a variant of the standard Lisp programming language. Its main feature is the ability to automate repetitive tasks using macros, like creating shapes, drawing a line with the same stroke options, duplicating objects, placing objects on a specified layer, etc. AutoLISP was the primary interface language for many AutoCAD tools. Before Release 14, it was the only way of creating macros that were executed from the Run menu. It was superseded by Visual LISP. Visual LISP Visual LISP is the successor of AutoLISP and replaces it in AutoCAD 2006. It is a programming language for AutoCAD. Visual LISP includes many new features, including enhanced macros, case sensitivity, conditional statements, objects, etc. VBScript AutoCAD supports VBScript. It is a Microsoft Windows Scripting language, which was originally designed for general scripting, but is now being used in different areas, for example in the control of the AutoCAD function palette. AutoCAD JavaScript AutoCAD supports the programming language JavaScript. It is a Web-based scripting language, which allows users to create macros and applications. It is similar to Java in terms of syntax and features. Functions can be used to generate drawings, automate processes, and add features to AutoCAD. Developers can also include external JavaScript libraries, such as the JSAPI, and generate JavaScript from AutoCAD for compatibility with other AutoCAD clients. With the release

of AutoCAD 2017, JavaScript support in AutoCAD was discontinued. See also [Adobe Illustrator](#) [Adobe Photoshop](#) [Adobe InDesign](#) [Illustrator \(application\)](#) [Adobe Creative Suite](#) [References](#) [External links](#) [AutoCAD Guides](#) and [Tutorials](#) [ca3bfb1094](#)

How to Get Started: To import feedback from the Feedback Window, select File > Export > Import Sheet. Choose Design > Markup Import to add a new design setting to the markups window. You can also import feedback from paper, such as paper comments, in the same way. Open the Design Settings > Import Paper and export Markup Assist. Use the Markup Import dialog box to choose the type of feedback you want to import.
