pretty simple question. Yet, many who try to lift weights have been discouraged because they didn't start with a proper technique. There are two main factors here: Not knowing how to effectively use your own body weight and the weights they provide. Not knowing what muscles are actually involved in each exercise. In order to

increase your body's strength and fitness level, you have to start with the correct form – muscle by muscle.

However, this article is not about the correct way to lift weights. This article is about learning the best way to lift weights.
