□Story□ A revolution... Over a thousand years have passed since the last war between the “Barbarian” and “Elden” factions. On the battlefields that featured humans and monsters, an heir of the hero of “The Elden War” was born. That heir, after being raised by the healer of the “Elden”, was sent to the “Barbarian” faction for his education. However, soon after he completed his education, he left the “Barbarian” to join the opposing faction, the “Elden”. He began to inherit their strong power, but his character was not perfect, and the dark side of his soul became exposed. In this war, the two factions were divided into two sides, the “Giant” and the “Human” sides. The war spread into the heavens and the underworld of the magical land, and destroyed everything in its path. The two factions fought for victory like a blur of red and black, and neither side had the victory. Finally, the “Barbarian” faction signed a truce with “The Elden” and started a peaceful life. However, unexpectedly, the “Barbarian” became the victors, and the “Elden” were forced to request help from the “Giants”. In a dramatic and ironic turn of events, the two factions were gathered and combined into a single “Elden” faction to fight with the purpose of saving the “Giants”. A long history... A powerful “Elden” faction developed on the battlefield. With the growth of the “Elden”, the rule of the “Giants” rapidly declined. The wealthy “Giant” traders and dignitaries lived in comfort, and controlled the lower class “Giant” in the underground. Although they were honorable “Giants”, the rich and the powerful were no longer an authority, and eventually the lower class “Giant” rose up against them. However, the rulers of the “Elden” were far stronger than the “Giants”, and forged a truce with them. The upper-

The World of Elden

Elden - a world where life and tradition coexist harmoniously.

The ancient kingdom of Elden is ruled by an Elden Lord, an elf of superior status. Elden, known as the civilization from the land of the gods, is a small country that lies between the sunset lands, alpine lands, and glacial lands. The people of Elden enjoy a peaceful and tranquil existence, living within harmony with the environment. In the ancient times, the elves led a noble, beautiful life. But since a long period of time, the elves have gradually descended into a state of inactivity. In these days, the elders of the elves have decided to wake the mountains to action again by worshipping the gods so that they will protect the elves. But one young elf, “Tarnished,” bears an evil that steals people’s souls and he tries to establish the state of “Thou Shalt Not Steal” in the kingdom.

As a young man, the current head of the Elven Army, Eleth, encounters "Tarnished". Eleth insists that the current Kingdom must preserve itself from the interference of the bloodthirsty goblin kingdom. But soon after arriving there, the fate that has been waiting for him, Eleth starts to uncover the "thou shall not steal" secrets of "Tarnished". He faces a trial that will determine his fate as a legendary hero. Unfortunately, the next chapter of his life unfolds before his eyes. After meeting new faces with a dark past, "Tarnished" is forced to leave the land with the intentions of protecting the people of Elden and of restoring his sense of dignity. ----- Magical Weapons of the Elves, Giants, Giants of the East, Dwarves and Humans by TAO The wages of sin is death. It's being caused by an import error. I've tried running all migrations, as well as forcing migrations to run. None of that seems to help. Am I missing something? Thank you! Edit: Adding a picture of the error as per the comment request. Error A: I figured out the issue. I was using the Django site template, and for some reason that had a different set of apps/packages than the version I had installed locally. For some reason, the installation from Heroku was missing the "Site" app as well, hence the error. I was amazed by the original concept behind Clockwork at this years Toy Fair. The modern reimagining of the Marquis de Sade, infamous for the atrocities he committed on his slaves, was a huge topic of conversation. Three years later with the release of Showtime’s shocking miniseries, I saw the viral marketing for Mad Max: Fury Road and was equally as surprised by the theme to that movie. Now the theme of the upcoming Frankenstein movie/Netflix series is equally as memorable. Dark and gothic, the classic monster story that started over 200 years ago is currently in the midst of a digital renaissance. The musical score is one of the aspects I was most interested to look into. When I first saw the opening scene in the trailer, I figured it was going to be a very dark and somewhat dissonant score. Due to its success with Game
