“The Burial” is a 2D Windows and Linux/Mac game built in Unity and C# with cross-platform input support. Players take control of a fantasy hero, trying to survive in a hostile world with hordes of enemies, traps, and difficult circumstances. Players must experiment with multiple survival

---

scenarios that each have their own background, vibe, atmosphere, and purpose. Along the way you'll be discovering your role within the game, doing things like taking photos, crafting items, or investigating places to obtain resources needed for survival. Players get to explore a fantasy world filled with dungeons, buildings, and spots that have been hand-crafted. There is no easily-guessed solutions. Players have to think about everything, and then hit each decision with an open mind and heart. Everything is meaningful and has it's own role. The United States has helped the Saudis block a congressional investigation into the murder of journalist Jamal Khashoggi, breaking a promise to do so, senior senators said Wednesday. Sen. Chris Murphy, Democrat of Connecticut, said he had spoken with Secretary of State Mike Pompeo on Sunday, when he discussed the murder of Khashoggi. Murphy said he had reminded Pompeo about the promise he had made to him and to members of the Senate Foreign Relations Committee in private, in which Pompeo had promised to use “every tool at our disposal” to conduct an inquiry into Khashoggi’s killing. “I told Secretary Pompeo and I have reported to the Foreign Relations Committee that the statement we are issuing now is the final one and that the investigation is concluded,” Murphy told MSNBC.

---

“Secretary Pompeo said, ‘That’s not true, we’re giving you an opportunity to respond.’” Murphy noted that Pompeo had promised in a meeting on Sunday that the department would allow senators to have access to the intelligence that officials had collected on the killing of Khashoggi. But CIA Director Gina H

Q: Is it possible to create a c# enum member and set a value? I have this enum: `public enum MyEnum { None = 0, [Insert Display Text Here] }` and i want to set a value inside it, it doesnt seem possible though: `MyEnum.None = 10;` Does anyone know if that is possible, if so what would i have to do? A: Look into value tuples. You can use them for this

---

purpose without using a class for it. Example.

```
enum MyEnum { None = (short)0, NoValue = 0 }  
static MyEnum GetValue(string val) { if (val ==  
    null) return MyEnum.No c9d1549cdd
