(Grouper, Inc. is not a sponsor, affiliate or partner of this particular pack).Media playback is unsupported on your device Media caption Alleged Greek politician eats doughnut after parliamentary vote Greek politicians have been trying to express their anger at the early parliamentary elections, after a centrist party boycotted the vote. But one of the leaders on the centre-right, the junior coalition partner, has been pictured in tears after eating a doughnut. The centre-left opposition Democratic Left party said it would boycott the polls as well. After a heated session of the parliament, Alkis Stergiopoulos ate a doughnut before dawn, saying that the vote would not help the country. "I

Icon Pack 20 is a skillfully crafted collection of icons that will provide you with a couple of icon replacements you can use for your dock applications, as well as for normal files and folders. All the items that are included in this pack come in two flavors, namely ICO and PNG formats. The former is the native format supported by Windows for any files and folder, while the latter is used mainly by dock programs that will handle this particular file type for the icons of the apps they host. You can contact us at: help@appsorama.com \_\_ Like us on Facebook: Follow us on Twitter: patient with deep basal ganglia and ventricular pseudocysts: a possible case of multiple mononeuropathy. A case of multiple mononeuropathy in a 54-year-old woman with a long history of basal ganglia pseudocysts is described. On neurological examination, her muscle bulk and power were normal, but bilateral Babinski's signs and Lhermitte's sign were present. The tendon jerks and vibration sense in the lower extremities were not well detected by conventional manual muscle testing. The thermal sensation and proprioception on the left side were impaired. Electrophysiological examination revealed diffuse slowing of the motor nerve conduction velocity (peak latencies of the median and ulnar nerves were not prolonged) with a full amplitude at proximal stimulation (DML = 7.8 ms, PD = 1.1 mV). The sensory nerve action potentials were reduced and polyphasic. Clinical and electrophysiological evidence of a mononeuropathy was present. This patient may have had mononeuropathies of the upper and lower extremities, which were not detected by
