I have a selenium script, that ask to a user to register and i need to make a new user, that login on firebase, with the email and password that was provided. This is my code that i'm using: export const loginUser = async function(email, password) { return new Promise(async (resolve, reject) => { by (const user = await jwt.sign({ _id: Math.random(), "token": firebase.auth().createUserWithEmailAndPassword(email, password).catch(error => { reject(error) }); then (data) => { resolve(user) }, (error) => { reject(error) })); catch (error) { reject(error) }); }; The problem is that it says that i need to pass the id_token to the createUserWithEmailAndPassword firebase.auth().createUserWithEmailAndPassword(email, password, function(err, user) { if (err) return errorHandler(err); const uid = user.uid; }); But my problem is that i have no ID_TOKEN, so i cant use that. So my question is, is there any way to set this information and be able to make a new user with fire
