Note I use Illustrator with Photoshop for logos and illustrations in magazines. It is also a good choice for logos because logos are usually printed on a poster stock that doesn't show up the pixilation of vector art. Adobe Illustrator is a powerful tool for creating clean designs, but its complex interface can be intimidating for beginners, and like Photoshop, Illustrator has its quirks. **\*\*Practicalities:\*\*** Because Illustrator is often used for logos and small, clean designs, it is common for beginners to start with Illustrator because it is easier than starting with Photoshop. Illustrator has a beginner-friendly mode, and it is easy to learn its basic features. However, if you are looking to create sophisticated designs, using Illustrator can be more challenging than using Photoshop. **## Adobe Fireworks** Adobe Fireworks ([www.adobe.com/products/fireworks.html](http://www.adobe.com/products/fireworks.html)) is an excellent graphics program for creating 2D and 3D vector graphics. It is extremely powerful and has been the standard for many newspapers and magazine graphic design in the past 20 years, and is still used regularly today. Many, many newspapers use Fireworks to design their graphics. Many magazines and catalogs still use Fireworks because it is an extremely powerful, easy-to-use tool that is very visual and interactive.

This guide teaches you how to create a logo for your company in Photoshop Elements. Disclaimer: The following tutorial applies only to Photoshop Elements since it only contains the features and features it does not need the features in Photoshop. With the exception of the tutorial below, everything here can also be done in Photoshop Elements CS6 or later. 1. Open your project in Photoshop Elements 16 First, open your project. For this tutorial, we will open a pre-built logo in Photoshop Elements 16. Open up the document. 2. Make a layer With the image in the document open, duplicate a new layer. I like to do this with the Command + J keyboard shortcut to duplicate the layer. Select the option to create a new layer. I also like to rename the layer to match the logo or website's name. 3. Vectorize the logo Make the next layer the vector layer in the Layers Panel. Make the next layer the vector layer. 4. Free Transform the text of the logo Turn on the Free Transform icon in the toolbar. Then click the Free Transform option in the Transform panel. This will allow you to move the text of the logo around the canvas, without distorting the photo or losing the vector outline. Click the Free Transform icon to turn on the tool. 5. Resize the text of the logo Next, to resize the text, click the Add Shape tool icon in the top toolbar. Click once on the Resize icon. The ruler icon will appear at the top and a blue line will show where the text will line up. Click once to add the shape. 6. Make the shape into a rectangle Click the top icon in the top toolbar to exit the shape. Click the icon next to the red circle in the top toolbar to exit the rectangle shape. There is no need to move the shape yet. You can always move it later if needed. Now click on the bottom icon to add a rectangle shape to the layer. 7. Arrange the rectangle Now set a corner point or points to the bottom of the rectangle to fix the shape. Click the rotation tool icon to exit the rectangle shape, and then click the 05a79cecff

Molecular docking studies of ketoconazole and macrolides on rRNA of methicillin-resistant *Staphylococcus aureus*. Ketoconazole (KTZ) is an azole antifungal agent with antibacterial activity in vitro. Macrolides are widely used antibiotics. Here, we report on the comparative inhibition of ketoconazole and 16 macrolides against ribosome as a target in the pathogenesis of methicillin-resistant *Staphylococcus aureus* (MRSA). The protein model of the 50S ribosome complex was generated based on the crystal structure of the free 50S subunit of *E. coli* ribosome. The inhibitors were taken from the Docking Server in the World Drug Bank (available at [The macrolides covered azithromycin \(AZI\), erythromycin \(ERY\), josamycin \(JOS\), rokitamycin \(RKM\), clarithromycin \(CLA\), azithromycin azalide \(AZA\), josamycin azalide \(JAZ\), rokitamycin azalide \(RKZA\), and clarithromycin azalide \(CLAZA\)](#)). The bindings of the inactives (JOS and RKM) with other pockets of the 50S ribosome of MRSA were compared with that of the azole (KTZ) and the active control (AZI). The docking results showed that the macrocyclic ring of the macrolides is placed deeply inside the ribosome subunits. Within the ribosome subunits, macrolides' binding sites for erm antibiotics are different from that of azithromycin. Nodal calculations of the macrolide inhibitors show that they are similar to the control drug (AZI) in the active site, while JOS and RKM have similar scores in other sites of the 50S ribosome of MRSA. The results provide promising reasons for designing the chemical modifications in the part of the macrolide ring which may improve its activity and reduce its toxicity. An influential Constitutional Review Committee has recommended the introduction of a new senate voting system. Last week, the committee recommended any new senators face the winner-takes-all system if they are elected from the same state, which will be in place for the 2016

Our friends at DEI are doing some great work helping some exceptionally talented little kids know that business is more than a job. As the economy has moved away from the recession, the skills and creativity of our youngest innovators have increased exponentially. DEI is now opening the doors to a new catalog of tools and resources to help your preschoolers learn more about business with you - one tool at a time, from their most innocent age. Cheesy business stuff, huh? We think that's what kindergartners have to deal with. But we kid because it's so true. There are a lot of entrepreneurs youngsters in kindergarten through 5th grade. And kids in kindergarten through 2nd grade have already made a start on the business process. Most important, they're great at telling a story. It's a story that their classmates will lend a hand in telling. They offer great insights into the mess and magic of business. And that's how we found our wonderful kids. Our laboratory is in our back garden and what we're learning from our students is vastly more valuable than what we're learning from corporate leaders and professionals. DEI is committed to teaching at least one lesson each month to your children. Dosage determination for absorption and bioavailability of methadone in chronic users. Dosage assessment of methadone treatment is based on dose-proportionality, but little information is available concerning the adequate maintenance dose. In the present study, methadone in various dose levels (maintenance doses 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8 and 1.0 g/d) was administered to eight patients for 6 weeks, and plasma concentrations were determined by fluorescence polarization immunoassay. In general, the estimated intakes of methadone were far above the average daily consumption reported in the literature. The resulting methadone plasma concentrations varied considerably between patients and did not correlate with the given daily doses. For a given dose, the plasma concentrations of methadone were influenced by the amount of food consumed. In a 24-hour pharmacokinetic study after oral administration of 0.3 g methad
