Background In the first months of 1915, Imperial German military forces in East Prussia were under significant pressure from the Russian army to the east, as well as the French army to the west. Several towns and fortifications were under siege, as the Russian forces had no intention of fighting a major campaign and had no specific objective. In response to the invasion of East Prussia, the Russian Imperial General Staff planned a campaign to relieve the town of Grodno in late May 1915, but was called off at the last minute. The main Russian aim was to capture East Prussia and force the German High Command to divert troops to East Prussia, but after failing to capture Grodno, the Russians decided to launch an attack on a much smaller part of East Prussia—the town of Dantzig. The Russian army had already conquered the city of Mogilev, farther to the east, before leaving on their way to East Prussia. The Russians had captured a huge quantity of supplies from the Russians and Germans—equipment, medical supplies, and food supplies. The Russian commander, General Peter Ermolov, planned to make a surprise attack on the German lines of communication in East Prussia, using the captured German supplies and transportation. On 9 June 1915, the Russians began moving through a portion of East Prussia near Dantzig, and Ermolov's plan was put into effect. While the Russians were not interested in capturing the majority of East Prussia, they were interested in their capture of the city of Grodno, which
