What's New In?

The last few months have shown that this new web-based platform has already proven its value. Now you can start an import job, download an imported file, and then send the imported drawing to your coworkers within hours – without starting a new project. Now, you can also add comments and annotations to drawings in the importing process and create a feedback collection to share with colleagues. You can send a drawing as a Mail Merge attachment (pdf, doc, ppt), or create a simple feedback form to integrate into your software and send the responses via email. Your projects are becoming more complex. You need help – quickly. Our intelligent technology now includes powerful tools to help you keep track of important tasks and information during your projects. Auditing: Get an overview of your drawings with automated auditing. AutoCAD's new Audit Report function lets you perform multiple tasks in just one action, and all analysis results are automatically consolidated into a dashboard. For more information, check out our short video: Workflow: Workflows now provide a graphical and step-by-step guide to provide a self-guided, step-by-step sequence for complex drafting tasks. Autodesk® Vault for AutoCAD® 2021 (formerly known as AutoCAD® 2020 Vault) is also now available in AutoCAD 2023. With Vault, you can securely store your drawings in the cloud and access them from any device. There are no limits to the number of drawings you can upload to the cloud, and no need to purchase a license. The application is available at no additional cost. Rapid Repair: Rapid Repair can now repair geometric errors as you type. Imagine typing "X" to delete a face, and then on the next line typing "Y" to remove the entire line. "Z" deletes the face and a new line, and "M" restores the previous line to its original shape. Improved user experience: We've redesigned our UI to provide an intuitive navigation experience. Most frequently used drawing commands are now at your fingertips on the ribbon. New tools, including the "Visualize" feature, can be accessed directly from the ribbon.
