Expanding on the success of last year's indoor break-out game, Ragdoll Blaster, Ubisoft Studio Osaka presents Alba the Animal in World, a beautiful adventure game in which you can save the animals. Gather yourself before the screen with your trusty camera and your pose one of the

---

lovable animals to engage in a burst of affectionate shooting. Wield your finger across the screen to pet the animals and pluck them from the ground. Their soft fur will feel soft to the touch, thanks to a unique brush feature.

Gameplay: - You need to observe every game carefully and become familiar with the game's controls, so that your first time playing Alba: A Wildlife Adventure won't be boring. - Be careful not to stray from the edge of the screen and avoid trees, fences and buildings; otherwise, you will no longer have an opportunity to pick up the animals. - It's possible to tap the screen when you have a certain animal you want to pick up. A pet will appear on screen and you can be happy as a clam pulling on a fish or a happy bunny pushing aside some random leaves. - Touching animals boosts their affection and makes the shots on them more effective. - The camera is slightly offset from your point of view, so it's important to be careful and use the right movement to always be on the right angle to shoot accurately. - In real life, it's difficult to walk very quickly. However, you can see a fast movement of the animals when you have a good angle. - You don't have infinite bullets, so don't shoot them just for fun. You'll have to sell the animals to Hilda, a veterinarian who will help you to nurture the animals and the natural world. - Your level goes

---

up with each of the animals you've saved. You'll be able to play the game several times and increase each pet's level. -

You can also take pictures of the animals. - Change your camera settings to be able to take more good pictures. (Of course, you can do it any time you want.) - When you've gathered enough animals, your big moment will arrive. - Hilda will reward you for each animal you've brought her. -

Start the level again when your number of total animals gathered hits 100 and keep moving to collect more. - When you reach the goal, you can buy the animals you've gathered in the store. - Be careful and do not leave

In "The Mystic" you will be able to meet gods and goddesses, fight against each other and decide which gods you want to follow. A war is about to start and you are the one who will make the difference.

**Diagonal Strategy Gameplay Map:** You are about to face the edge of the world. The icy North, where the power of the tribes lies. This is where the cult of the White God has its power. It controls the Great Caves, and the people believe that the White God will bring them victory in their struggle against their enemies. In the south lies the territory of the Black God. The barren land of the Black God is the nearest thing to winter. But as the people have no land, the Black God has used their faith and increased their pay. This is where the Dark Goddess rules, the god of suffering. It is now the time of his triumph, in which the people of his race will rise again. In the west lies the territory of the Oak God. The people of the ancient and mighty oak planted his people on this land. There is no land for the people to live on, but they believed in him and kept the oak in his honour. The Oak God will grant them peace.

**Character Building:** [The Mystic] The first step in the game is character building. You can select 5 out of 5 gods. Each

Each god also has different units and rituals that will help you in the upcoming battles. The god of the oak is made of both spring and autumn, which makes the god a symbol of the dawn of man and the end of man. The White God is the god of life and freedom. The White God is covered by snow and has a majestic and noble appearance. It is the Lord of the Spring

### What's new:

**Review Atelier Firis: The Alchemist and the Mysterious Journey DX is the second Arland adventure. A re-release of the original title Atelier Firis, this one will be sure to please for those looking for something new to play. One thing I noticed is that the opening movie featuring the original Atelier Firis character Atelier Alise is now in the box Artwork. I'll admit, I never liked the opening in the original release. This one doesn't disappoint, it's a little shorter, yet still features the beautiful world, and the story as before, it's not going to matter much since it just follows what happens in the original atelier firis so you'll get the same effect, and that's what is important to me. In any case, with this new release, being released for Nintendo 3DS on June 14th, will it be enough to lure the original gatakers back, and will it be the new "must play" game on the platform? Let's take a look and find out!**

**Atelier Firis: The Alchemist and the Mysterious Journey DX is a standard difficulty on the Nintendo 3DS eShop. One thing I like about this game, is that unlike the first part of Atelier Firis series, this one does have its storyline, but it's still a little short compared to other RPG titles. The first**

**mechanic is where you pick up different alchemical materials like Potions, Potions, Glasses, and Lamps from your new alchemical journey. The second thing is where you start your adventure on a volcano. Luckily, this volcano is safe as long as you get enough materials, first you have to collect the materials, which isn't too tough, and later you'll have a collection of these materials, then you have to combine them. Here are some example of potions and various glasses/lamps for those players interested in the alchemy materials. These options are listed on the bottom. This is not huge, as the menus scale accordingly with the graphics on the Nintendo 3DS. First impression, this game is visually far better than the first title in the series. From the volcano to the alchemy profession, and everything you can do from it, and from the point of view of the overall game, this game has improved on the**
