A System That Allows You to Change the World as You See Fit! The Saga System has been created that allows you to completely change the game world by bringing over previous Stories or editing older events that occurred in the game in order to make up your own Story.

App Directory Anime Team Spirit POKEMAProduction Music Game play RPG PC PlayStation 3 Steven Universe is Upgrad(I'm officially a big fan and a huge Steven Universe fan. So I'm glad the extra "un" version was made and it is now available. I hear, from the comments I have been seeing here and on Twitter, that it was a popular version with a lot of people. Which is nice to hear. A little less disappointed is that this game is able to support random leveling. Which, while not making it completely unusable like a majority of RPGs seem to have to try and do, is still a nice touch I feel. I hope more future games come with this touch so more players can participate fully. I know a lot of gamers played games like that in hopes for that thing to really get going so I'm glad at least people are finding some relief. To get to that point.) [Sig by wright82] Yes, while it's not the complete ideal of being able to want it all, I like that the game gives the option of random leveling up as well. It feels a bit more like the truth than always being locked into a certain level cap. The difference that is made by this is that you wouldn't be outmatched for 100% of the enemies. I feel this much more than other RPG's. Though the leveling is random you can still level up to an extent. Which is a nice change that changes up the level. It makes the game a bit more of a search. To see what you can get to the max level.
