To set the default destination directory for my project, I use environment variable WM_PROJECT_HOME. But I would like to use the value of WM_PROJECT_HOME inside a String.Format. How to do this? A: You'll need to create a custom property for your app to use. The documentation on the MSDN site has an example that may be relevant. A: I found a workaround to this by adding a file to the solution root and placing the contents as follows: #define WM_PROJECT_HOME \${env:WM_PROJECT
