A Dig Into Classic Beer Styles Odds are good that if you ever sit down with your grandfather to palaver over your favorite beers, Grandpa is going to point out just how awesome he used to enjoy a well-made light beer. You most certainly used to enjoy the stuff. Sure, now it's easier to go for a more complex, elegant beer. You can find bottled pumpkin ales, barrel-aged saisons, and other enjoyable recipes, and you can find them at gourmet groceries and the best wine and beer stores across the country. But this is no shock. The world of beer has changed quite a bit over the past five to ten years. The good news, if you're really committed to drinking well-crafted beer, is that making those types of beers is easier than ever. You'll never again have to sniff the brew in a dark bar searching for it, or launch into the worst Grateful Dead impression in the hopes you can pronounce an odd-sounding malted cocktail. But the sad news is that these light beers—once so big in almost every American household—are still the choice of many. The number one beer style in America is the domesticated beer. You find it just about everywhere: in a neighborhood bar, a suburban drinking establishment, or an industrial-sized restaurant with too many taps for its own good. American light beer is the beer choice of a people. But that often overwhelming fact does not mean that light beers are the ideal drink for you, or for the people and places in your life. The classic beer style I want to look at is unique to the United States, one that likely could not travel well to several other countries, and one that is part of our country's collective cultural memory. And besides, beer types are the first, and

perhaps most important, lesson in beer education. The Kind of Beer Style We're Talking About While America is ridiculously big in terms of beer production, the United States is home to just a couple of distinct beer types, especially when you account for other countries that are also spreading out their legs across this beer tree of ours. Without digging too deep into the roots of history, it can be argued that this is because in America, we recognize there are certain beers to be made, and we make them. Europe has been dominated by beer styles for so long that they now have more acceptance for all beer, from the common German pils
