Select a character and move to the top of the screen. 2. Select one of the two main weapon types (sword or axe) or a sub-type. If you are going to use magic, select the three sub-types of magic (spell, dagger, and claw). 3. Select the equipment of your choice and equip it. (Equip priority is sword first, axe next, magic last.) 4. It will usually be recommended to use a certain sub-type of armor, but you may decide to try another option. 5. As you equip equipment, it will be assigned to the hand in which it is equipped. For example, if you equip an ear ring to the left ear, it will be assigned to the left hand. If you later want to equip the same ear ring to the left arm (using the right hand), simply equip it to the right hand. 6. Magic uses mana, which is only replenished when you use magic. However, if you use magic frequently, your mana will be fully depleted and you will not be able to use it for a short time afterwards. 7. If you use a range attack with your sword, you will usually use a slash attack. If you perform a guard, you will use a lunge attack. 8. In close range, you can perform a physical attack with the sword or axe. If you are unarmed, you will have to use your magic. 9. After exhausting a particular skill, your character will perform another action. For example, if you perform a guard, you will have to use a slash attack the next time. This is called a Performing Action. However, if you hold down the left mouse button, you can continue to perform actions using the same skill. For example, if you hold down the left mouse button, you can continue to perform slash attacks or guards. This is called a Continual Action. 10.
