However, the story told in the Shaiva Purana is also well. The Holiness of Amrutha is taken care of by the. the presiding deity of Thirukolilur. The temple forMismatch negativity in children with autism spectrum disorder. We compared the neurophysiological activities of mismatch negativity (MMN), a brain response to a change in a stimulus, in 19 children with autism spectrum disorder (ASD) and 15 control children. The ASD group consisted of children with a mild range of intellectual disability (IQ below 70) and the control group consisted of children with typical development. The MMN responses to a change between deviant and standard tones were elicited with a simple repetitive 'odd-ball' paradigm. The children were instructed to attend to and discriminate the stimuli. The ASD group did not show any impairment in the MMN responses. In contrast, both the ASD group and the control group showed impaired performance in a visual short-term memory task compared with the intelligence quotient scores. We conclude that it is unlikely that the MMN responses in children with ASD are altered in the presence of a low intellectual level.Q: how to get value from another page in asp.net I have a web application in asp.net.
