Q: Show a message in a unordered list in PHP without using PHP Markdown I have a chat bot that will send a message to a specified users. The message is going to be displayed in an unordered list. I'm using PHP Markdown to insert the message into an unordered list. The problem is that I don't want to display any messages from the bot, but I want to display text directly from the source code that was sent by another user (ex. @MyName sent the message "Hello, are you there?"). I tried setting \$message = " but that doesn't work and I got a syntax error. I have tried looking at other answers for this problem and was surprised to find no answers for this issue. Does anyone know of a way to do this? A: You're looking for: echo "\$_GET[message]"; Notice the and the \$. Giant cytoplasmic inclusions in atypical lymphocytes of the tonsil-associated lymphoid tissue. In a series of 42 cases of lymphomas and lymphoid hyperplasias of the tonsillar area, three cases of possible aggressive B-cell lymphoma were found to be associated with giant cytoplasmic inclusions in the atypical lymphocytes. Review of the literature indicates that the presence of these inclusions in atypical cells of the tonsil-associated lymphoid tissue might be associated with a severe clinical course. Immunocytochemical staining of the cells with the L26 and L27 monoclonal antibodies showed that the inclusions were negative for cytoplasmic IgM and positive for the S and L3 myelomonocytic antigens. These results, in conjunction with the loss of the lymphocyte surface markers c6a93da74d
