
Cannon Super Mario Bros Wii !FULL!

this cannon is on world 5-3, in the narrow passage that follows world 5-2. to reach it, you need to jump down and immediately up. make sure you jump up far enough to avoid the gap in the stage. you may even want to keep jumping up and down while jumping in the air, to make sure you're jumping upwards. this cannon can be found in world 5-3, in a clear hole in the stage. all you need to do to warp here is to jump down at the correct time. the cannon pushes you into the ground and performs a counter-jumping aerial shot. simply time it correctly and you'll find yourself in a safe spot. the fourth warp cannon on world 6-2 is a little bit of a pain to reach. it lies in a small, isolated part of the level, and a wall blocks the way once you enter. to get into the correct position, you'll need to jump down about half the screen's height. from there, you'll need to jump straight up to reach the gate. the cannon pushes you back into the ground, and performs a counter-jumping aerial shot. just perfect timing should allow you to warp into the secure area. you'll then fly up and through an underground maze of spinning red blocks. when you reach the top, you'll be in the lost world, a series of small levels filled with hidden hatches and platforms. though you can simply jump to the top, you're much more likely to run out of time if you try to make the journey straight up. fortunately, there are several hidden hatches along the way, including one at the bottom of the screen. take each of them as they appear, and you'll eventually find a hidden warp pipe. this path leads to world 4-8, the world's final warp cannon.
