ACR122U Software Development Kit SDK Free Download

ACR122U also includes a compact wireless development kit to help you create applications for any wireless communication device. You can use the development kit for experimentation and to test application feasibility. Read more on the web site. The ACR122U NFC Reader is a PC-linked contactless smart card reader/writer developed based on the 13.56 MHz Contactless (RFID) Technology. Compliant with the ISO/IEC18092 standard for Near Field Communication (NFC), it supports not only Mifare and ISO 14443 A and B cards but also all four types of NFC tags. The ACR122U with V2 firmware and an internal buzzer as well as a bi-color (red/green) LED which can be programmed to respond when a card or tag is in field or being read/written. It is fully PC/SC and CCID compliant, resulting in easy plug-and-play installation on Windows PCs, while support for Mac OS X and Linux is also provided. Containing the PN532 controller chip from NXP, the ACR122 is also supported by various open source libraries such as libnfc (org page). PPC Capability You may notice that the application had to handle COM specific issues and errors, for example, it made file operations using the [Path] class. ACS works with classic COM objects for data exchange, i.e. it takes a file object to launch the read, write, etc procedures. Let's see the code of how to work with PPC that operates with a PPT document using the ACTION method, that extracts the action filter function from the PPT document the user has just clicked: private void button1_Click(object sender, EventArgs e) { string action = "READ"; if

(acr122u.ReadTextFile(@"C:\PT\1.pdf", action)) { MessageBox.Show("File was read! It is: " + action + " Action item name: " + acr122u.GetActionItemName(action)); } else MessageBox.Show("Cannot read file!"); } 5ec8ef588b
