a well known crack writer, but a little too short on reasoning why he would lower a game to make it work on a dual core, a P4 2.0 GHz CPU is about the most common one used in dual core computers. Im a crack writer myself and know that if you use kis and its friends, your game will run at glacial speeds. I just think that crack writers should be a little more informed on what their talking about. A cracked game will always be slower then a original. Ok I d/l's the paul dll, and the original paul.dll and the game runs full speed (and its amazing compared to the original) Anyway a big thanks to crack writers for providing this for us all, I'm sure this will help many users with their copy! Ok thanks, Ive been wondering why this couldnt run on my dual cores. I use Vista in some cases and NFS UO runs fine allthough much slower then most games, Yes I use the

original crack also. I will wait for the Christmas deals. Actually I have no problems with it running on dual cores. I have two dual core CPUs in my lap and it runs fine. I am however getting the inability to run the game at decent speeds (certain missions are running slow) So im now trying to figure out where to look for the settings to change the performance of the game on dual core since all other games/cracks/other. I would like to get my games running full speed. If I had a regular 1 core with Dual Core processor, I wouldnt be having a problem. I d/l's the crack and change the paul.dll to the original and ran the game. HmMMM well its great compared to the original, but I cant get the game running full speed, although I did change the camera settings to driver (I had them at default) I did change the Themes Service off, which worked, I changed the Game Mode to Office and then started the game and the dont have anything else installed (other than the game) and I have a nvidia 7 series and I run S.M.A.R.T. Also

Nfs Undercover Original Exe File

i noticed that nfs undercover runs fine if you have a 2 gig hard drive. i have a 2 gig hard drive and

nfs undercover runs fine. when i have a 4 gig hard drive it does the same thing, i tried to install a 1 gig hard drive on my motherboard and that did not work. i do not have the 1 gig hard drive so i bought a 4 gig one and it did the same thing. i have a computer that was just built and it has a geforce 6800, i did have a 32 bit vista on it and the game ran fine. now i have installed vista 64 and it runs fine with no problems at all, i was wondering if i will be having problems again with nfs undercover. yep, i have the same problem. can you tell me if this is due to my graphics card? my computer is a laptop, and i have a geforce gtx 285. i think it has something to do with my graphics card. because, when i play nfs undercover on windows xp, i have very high frame rate. although, im not able to turn everything off in my windows xp, because when i do, the mouse and keyboard dont work. but my laptop works fine with nfs undercover, not sure if it has something to do with my graphics card. unlimited cash, unlock all cars, cars cost zero money, unlock shop/aftermarket parts, 999.999 zone points, unlimited nitrous, unlimited speedbrake mode, remove police heat level. made exclusively for cheat happens. written for the original retail version of the game. may not work with all

versions. read the included readme file with notepad for important instructions on using the trainer. this trainer features customizable hotkeys. i just bought the dll from a site to fix the problem with the game and it works 100%. i downloaded the dll from the link below and i used the original paul.dll (guv, urs is removed)but still doesnt help. i have a core 2 duo and a 2.53ghz 2 gb ram. i have a nvidia 7 512mbseries card. i doubt this would creat a problem since the read me file recommends the nvidia 7 series also.. the default settings were initially pathetic.i changed all the graphics settins to low and changed my camera setting to driver. things did improve a bit and still it remains insufficient. not so kickass as most wanted. could anybody suggest ny other alternative 5ec8ef588b
