How to remove SwitcherVirus and other Viruses in Windows 10. Black and white screens, random applications crashing, and browser auto starting have become the norm. Recently a new PC virus called Switcher has started appearing and this virus is affecting Windows 10 users, BASHHARS, MACS, LINUX. i have come across the a few virus in my PC, but none came in the memory of my OS. So i decided to remove it. The main aim of this video is to teach you how to remove the virus in a secure manner. naturally, the best method of de-virus is a good anti-virus. but today we will deal with a PC without an anti-virus and that's why you need to be extremely careful. So, in this video, i will show you how to get the most from your PC and protect it from viruses, suspicious files and others at the same time. 1. Uninstall the pre-installed software First off, we need to take a quick trip to the control panel and then delete any unwanted pre-installed apps. 2. Remove any downloaded programs (including games) Here we need to remove any downloaded apps from the web as well as your PC. But don't worry, this app

Switching from mobile to a battery can save up to 50% on your laptop. Power Scheme Switcher is an application that allows you to manage your laptop's battery power. This application has been designed to be as easy to use as possible. Click on the Switch button to check your current power plan and to activate another one or to select your power plan directly from the tray. The application has been developed in accordance with Microsoft guidelines, and includes a compatibility check before launching. Use the "Power" tab to check your current power settings. The applications I usually use to switch from mobile to a battery are:
